Murarrie Qld 4172

Dear Greg,

Thank you for recently demonstrating your Structapanel H2 12mm timber flooring underlay product to our Technical Manager for review.

Upon examining the data and performance information, we are pleased to advise that we will be including your product in the ATFA Solid Timber Flooring Industry Standard. Section 3.7 of this manual is currently headed – ‘Installation over plywood or battens on concrete slabs’. This section will be retitled – ‘Installation over sheet sub floors or battens on concrete slabs’. The pursuing text included in the manual will subsequently list plywood and your 12mm (minimum thickness) product or similar products with at least equivalent properties, as acceptable products for timber flooring to be installed upon.

It may take several months before the manual update is concluded, as we are just commencing the review now, as such you are most welcome to use this letter as a reference for future business purposes in the interim.

Kind Regards

Randy Flierman
CEO
